

Film: "ATOMIC STATES OF AMERICA"

Friday, January 18, 2013, 7:00 to 9:30 PM

(90 min, Don Argott, & Sheena M. Joyce, 2012)

In 2010, the United States approved the first new nuclear power plant in 32 years, heralding a "Nuclear Renaissance". But that was before the Fukushima accident in Japan renewed a fierce public debate over the safety and viability of nuclear power.

The Atomic States of America journeys to nuclear reactor communities around the country to provide a comprehensive exploration of the history and impact to date of nuclear power, and to investigate the truths and myths about nuclear energy.

As the nation stands at the crossroads of a possible Nuclear Renaissance, The Atomic States of America inspires informed discussion on the safety, viability and future of nuclear power in the United States.

(Event is FREE and open to the public! ...but Donations are kindly accepted).
