Transition Friday!

"IN ORGANIC WE TRUST"
(81 min, R. Kiplin Pastor, 2012)

When corporations went into the business and "organic" became a brand, everything changed. The philosophy and the label grew apart.

“Can gummy bears or bananas flown halfway across the world truly be organic?”

"In Organic We Trust" is an eye-opening food documentary that looks beyond organic for practical solutions for me and you. Local farmer's markets, school gardens, and urban farms are revolutionizing the way we eat. Change is happening from the soil up..

Followed by a discussion on resilient community and positive local solutions!
